

Horix Rotary Filler 32-Head

Mfg: Horix

Model: 2MCC-4 L3R

Stock No. 55.3R-2331.15

Serial No.

Horix 32 Valve filler with valves that are suitable for filling bottles with 28 mm caps, like a coke bottle size. It has 1/2 in. nozzles and centers between valves is 4-1/2 in., has a S.S. Bowl and a 3 hp GE Motor 208-230/460 V. This filler has a Carbon Steel frame with all contact parts and covers made from stainless steel 304. Guides are fabricated out of UHMW and are set for a 600 ml bottle. The filler can be adjusted to other size bottles but new guides will have to be manufactured.

The machine is set up to run up to 120 bpm in a 350 ml or 12 oz bottle. If you want to fill with a larger bottle, the speed will lower. For example, in an approximation to run with 1 liter bottles, the filler will fill about 50 bpm.

HORIX precision-engineered systems are ideal for packaging liquids of all viscosities. HORIX wealth of technical knowledge and expertise are available to satisfy a broad range of user specifications.
