

Brown Int'l Model 4000 Pulper-Finisher

Mfg: Brown

Model: 4000

Stock No.: MDWF041

Serial No.: 4001-BAAA-138

Brown International Corporation S/S Pulper Finisher, Model 4000, S/N 4001-BAAA-138. The model 4000 is a small scale unit designed to provide half the capacity of the model 202. Separation is achieved via rotating paddles within a cylindrical screen. Screen hole sizes are available from 0.375 in. to 0.010 in. This model is used in pulper-finisher applications, as well as dewatering, and other separation applications. Common products are apricots, tomatoes, pumpkin, pears, apples, plums, berries, prunes, figs, citrus juices, jams, soups, peanut butter, jelly, and fruit nectars.
