

Consolidated Packaging Machinery Capper

Mfg: Consolidated Packaging Machine Corp.

Model: D-4-FA

Stock No. JWIMS-11a

Serial No. 5299

Consolidated Packaging Machinery Capper. Model D-4-FA. S/N 5299. Capper set for a 70 mm cap and a bottle with a 3 in. diameter, about 18 oz bottle. Fabricated with a carbon steel frame. Control Box with 4 push buttons. One set to start and stop the capper. The other can be set to set up for the conveyor chain to start and stop. The machine has 4 capping heads that can run up to 80 caps per minute. 1 h.p. motor with adjustable speed. The maximum height of bottle the machine can adjust to is up to 10 in. with a 3 in. diameter. If different bottle and cap are needed, change parts can be manufactured at a cost. This machine does not have a bottle sorter but we can fabricate a new one.
