## USPI Portable Filtration

### Portable Filter Systems for Oil Reclamation

US PETROLON'S portable filtration systems are easily transported throughout plant environments to handle tough reclamation and transfer jobs. Designed to run unattended, the large filter housings enclose depth filter elements capable of holding several pounds of dirt and up to 5 quarts of water per filter element\* to polish waste oil to cleaner-than-new-oil levels. In bypass mode, the unit can also transfer fluids from one reservoir to another.

Through oil reclamation, US Petrolon portable filters help to minimize the environmental impact of manufacturing plants while preserving assets. Filtration extends both equipment and fluid life, saving money, reducing workload and lowering potential equipment wear.

#### 87 Series Specifications

- Chrome-Plated Steel Housing
- Rigid SS Piping
- High/Low Pressure Shut-off
- Low Voltage Protection
- Pressure/Flow Adjusting Gate Valve
- Suction Y-Strainer
- Oil Sampling Port
- Canisters can be Individually Isolated
- Fluid Transfer Mode (no filtration)
- Unattended Operation
- Pump: 6 GPM
- Motor: 3/4 HP
- Hoses: (2) 3/4" x 10' 501 PSI 210F rated
- Dimensions: 22-1/2"W x 44-1/2"H x 18.25"D
- Weight: ~160lbs.
- FILTER ELEMENTS SOLD SEPARATELY
